

**Coming to La Grande!**

# NICOLE FOSS

**A Century of Challenges**

**Nicole Foss, (known as Stoneleigh online), is a renowned international speaker who thinks that 2008 was just the beginning of our economic problems. Our fragile financial system is threatened at it's core, she believes, because the age of cheap energy is over - a situation commonly known as Peak Oil.**

**She'll show us how we can prepare for a better future by creating a new localized economy and stronger neighborhood bonds - the life preservers that will make all the difference during the coming economic storm.**

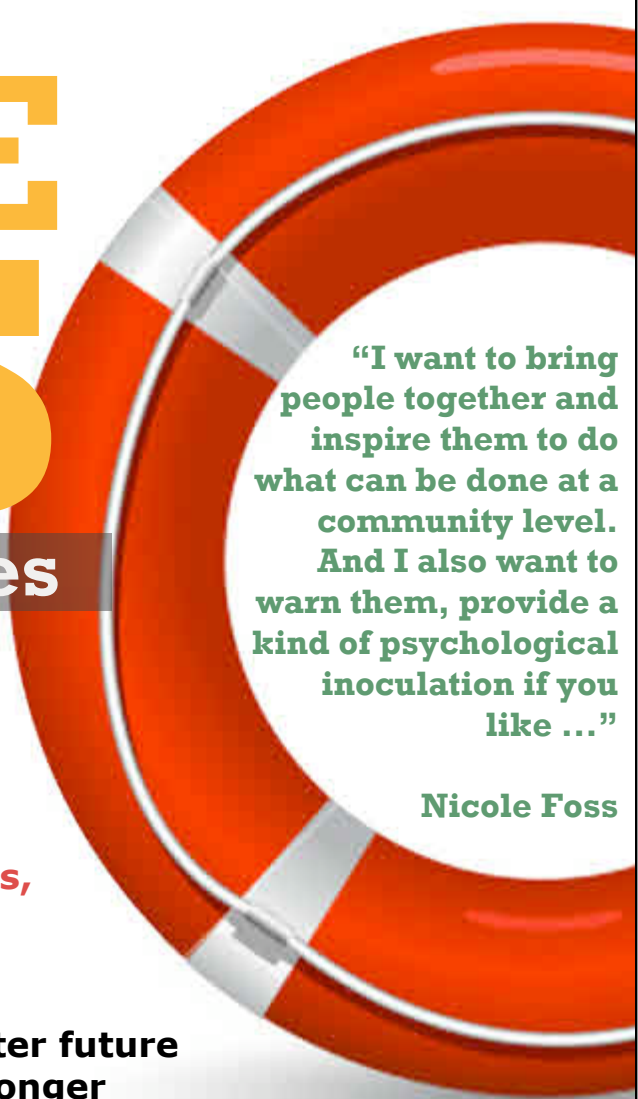

**Don't miss this eye-opening presentation!**

**Sunday May 29th at 7 pm**  
**Badgley Hall, Huber Auditorium**  
**EOU Campus, K & 6th ST, La Grande**

Nicole Foss runs the AgriEnergy Producers' Association of Ontario (focus: biogas projects and grid connections for renewables). She was a Research Fellow at the Oxford Institute for Energy Studies (specializing in nuclear safety in the former USSR). She has academic qualifications in biology, pollution control and international law in development. Nicole writes as "Stoneleigh" on the website: [www.theautomaticearth.blogspot.com](http://www.theautomaticearth.blogspot.com)

The talk is being generously sponsored by the EOU Students in Free Enterprise, (SIFE), club. Co-sponsors are Grande Ronde Transition and Oregon Rural Action.

**"I want to bring people together and inspire them to do what can be done at a community level. And I also want to warn them, provide a kind of psychological inoculation if you like ..."**

**Nicole Foss**

**Admission is Free and Open to the Public**
